

# THE CASE AGAINST CONTRACEPTION

**FACT:** The majority of women who abort their babies were using contraception when they became pregnant.

—*Alan Guttmacher Institute, research arm of Planned Parenthood*

Contraceptive failure rates: 7% for the pill, 16% for the condom, 22% for the diaphragm and 30% for spermicide. Figures are even higher for unmarried people.

—*National Survey of Family Growth*

"[F]or every 1,000 teens between 15 and 19 years of age enrolled in family planning clinics, we can expect between 50 to 120 more pregnancies."

—*Alan Guttmacher Institute researcher Stan E. Weed*

"Contraceptive users appear to have been more motivated to prevent births than were nonusers."

—*Alan Guttmacher Institute researcher Stanley K. Henshaw*

"With effective contraception controlled by women, there are still more abortions than ever. . . . [C]ontraception causes abortion."

—*Sociologist Lionel Tiger, 1999*

"At the risk of being repetitious, I would remind the group that we have found the highest frequency of induced abortions in the group which, in general, most frequently uses contraception."

—*Notorious "sexologist" Alfred Kinsey, 1955*

"As people turn to contraception, there will be a rise, not a fall, in the abortion rate."

—*Abortionist Malcolm Potts, 1976*

"There is overwhelming evidence that, contrary to what you might expect, the provision of contraception leads to an increase in the abortion rate."

—*Abortionist Judith Bury, 1981*

"The close connection which exists, in mentality, between the practice of contraception and that of abortion is becoming increasingly obvious."

—*Pope John Paul II, 1995*

"That same selfishness that wants to prevent the child by contraception will grow until it wants to kill the child already conceived."

—*Blessed Mother Teresa of Calcutta*
